Bring out the pioneer in you.

# Resources®

Scan to watch video

Resources® is a modern construction toy inspired by seven natural resources — Stone, Wood, Sand, Steel, Brick, Tree, and Water. With its unique, minimalistic design, children can freely build and create while sparking their imagination. Unlike traditional toys, Resources® features a **no joint, no lock, no magnet** system, encouraging kids to stack and balance, fostering problem-solving and mindfulness. Made from food-grade TPE plastic, its delightful texture adds a sensory-rich experience to every play session.

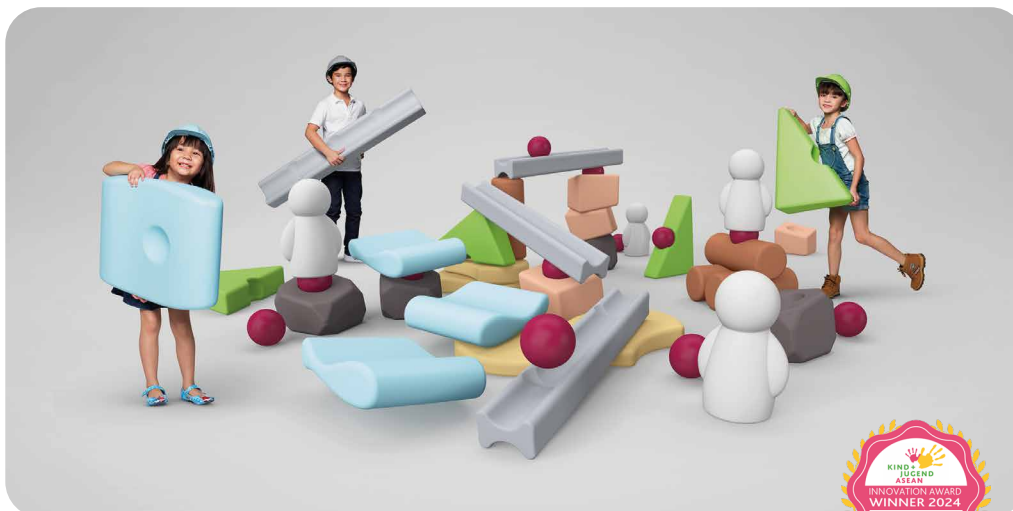

The Ultimate Collaboration

# Resources® playground

Scan to watch video

Resources® Playground is an innovative, large-scale version of the original Resources® construction toy designed to encourage collaborative play among children. Inspired by natural resources. This playground set features nine shapes that represent essential elements of our world. Each child is assigned a specific resource, identified by the color of their helmet or outfit, promoting teamwork as they must share and combine resources to build structures. Beyond playing by the rules, children can also freely enjoy the Resources® Playground in their own creative ways.

Takso Toys® The Balancing Toy for Toddlers to Masters

# Resources®

## STACK MASTER

Scan to watch video

Resources® Stack Master is a foundational stacking and balancing toy inspired by Zen stone stacking, designed to develop early skills in toddlers and kindergarten-aged children. Designed to resemble natural rocks and pebbles, it offers varying levels of difficulty — Simple, Advanced, and Extreme — making it suitable for toddlers developing hand-eye coordination and building confidence before transitioning to more advanced the original Resources® toys. Crafted from **Natural Rubber Compound**, it offers a safe, tactile experience ideal for young learners.

Takso Toys®

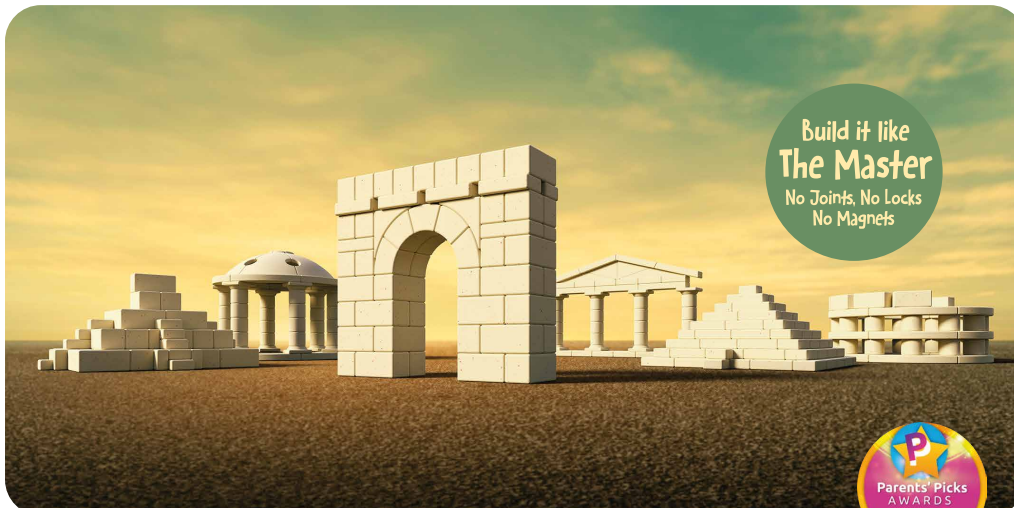

# Arch•Kid•Tech®

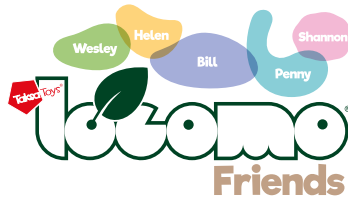

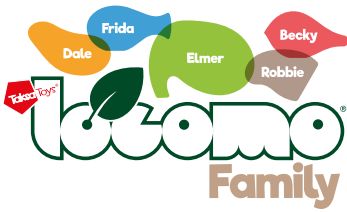

The ancient techniques for future architects.

Scan to watch video

Arch•Kid•Tech® is an educational building set that simplifies ancient architectural techniques from civilizations such as the Egyptians, Greeks, Romans, and Mayans. It enables children to recreate historical structures like pyramids, arches, and domes, fostering an understanding of classical architecture through hands-on play. Each set includes high-quality **TPE plastic** pieces that offer a unique tactile experience, along with step-by-step visual guides and illustrated leaflets filled with stories and trivia about ancient civilizations.

Locomo® is a series of eco-friendly, nature-inspired wooden animal figures designed to foster creativity and a connection with the natural world. Each figure features missing pieces, encouraging children to explore their environment and use natural materials like leaves, flowers, and twigs to complete their unique creations.

We always use Premium Materials :

TPE or Thermoplastic Elastomers is a type of plastic that has been refined to create a **soft, rubbery feel**. It is commonly used in household objects, like the grip on your toothbrush and the soft lid of a sippy cup, and it is also a popular choice for children's products. Its smooth touch, durability, and hypoallergenic properties make it suitable for young, sensitive skin.

Planwood™ is a unique and sustainable material made from excess rubberwood sawdust developed by Plantoys. This material is crafted by mixing **Sawdust** with **Organic Pigments** and **Non-Formaldehyde Glue** (E-Zero glue).

The material is primarily crafted from a **Natural Rubber Compound**, composed of **more than 80% Natural Rubber**. It is enhanced with specific additives to optimize its physical properties. The heat processing and drying steps effectively **remove Latex Proteins**, ensuring the material is safe for sensitive users. Furthermore, it is environmentally friendly, as it is biodegradable and supports sustainability efforts.
